Driver personalization has been taken to the next level and can be configured in multiple ways.

Soft materials combined with stitched leather effects add an extra luxury touch throughout the interior.

The 8" colour touchscreen with Apple CarPlay™ and Android Auto™ allows for seamless connectivity with your own technology.

The easy to use automatic transmission is fitted as standard. Controlled by a rotary gear selector in the center console, it's engineered to provide ultimate refinement in all driving conditions.

DAB Radio, keyless entry and satellite navigation further enhance the user-friendly technology in this family friendly electric SUV.

Owners can feel the benefit of a stress-free driving experience for long distances and stop-start city traffic.

There are three driving modes on the new MG ZS EV — Eco, Normal and Sport, allowing the car to fully adapt to your everyday driving needs.

The MG ZS EV is equipped with three levels of regenerative braking, which extends your driving range, improves your braking efficiency and your energy conservation.

Technical Parameters*

Length (mm)	4314
Width (mm)	1809
Height (mm)	1648
Wheelbase (mm)	2585
Unladen mass (kg)	Comfort: 1491 / Luxury: 1532
Battery (kWh)	44.5
AC charging time	~7.5 h
DC charging time (%80~0)	~40 min

MG Pilot →

High tech and safe.

The new ZS EV is the first MG to feature the full suite of MG Pilot driver assistance technology to give you a helping hand and added confidence on the road. A selection of warning and alert features help to simplify everyday driving and maintain safety.

MG ZS EV

SPECIFICATIONS

And
comes
in two
editions.

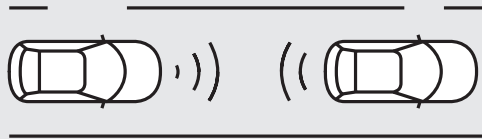

Comfort

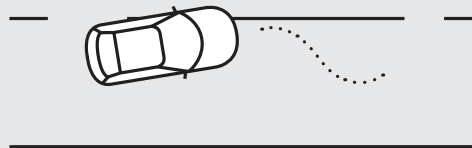

Luxury

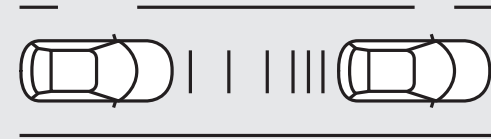

Active Emergency Braking (AEB)

At speeds below 20km/h, the ZS EV will automatically apply its brakes to avoid a collision with a vehicle, bicycle or pedestrian. At speeds above 20km/h, AEB will reduce the likelihood or severity of an accident.

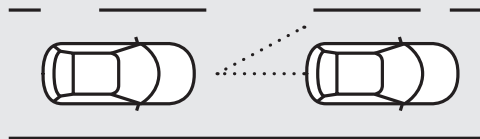

Lane Keep Assist (LKA)

Lane Keep Assist uses a camera to detect lane markings on the road ahead and monitors the vehicle's position in its lane. When the function detects the vehicle is about to unintentionally move out of its lane, it warns the driver by means of a visual, audible and steering wheel vibration. The ZS EV will also adjust and control the steering to keep within its lane.

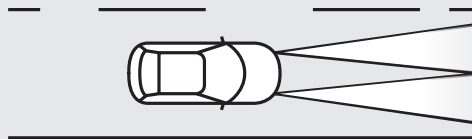

Adaptive Cruise Control (ACC)

Adaptive Cruise Control (ACC) monitors the road ahead. As long as the road ahead is clear, ACC maintains the speed set by the driver. If the system spots a slower vehicle within its detection range, it gently reduces speed by releasing the accelerator or actively engaging the brake control system. If the vehicle ahead speeds up or changes lanes, ACC automatically accelerates back to the driver's desired speed.

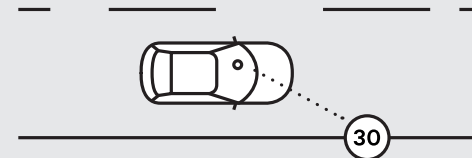

Traffic Jam Assist (TJA) *

When Adaptive Cruise Control is turned on, Traffic Jam Assist continuously monitors the speed of the vehicle in the front and compares it with its own driving speed. If the system detects dense traffic or a traffic jam at speeds below 60km/h, the driver can activate TJA. The ZS EV will automatically follow the vehicle in front, controlling its acceleration, braking and steering within the same lane.

Intelligent High Beam Assist

When the headlight high beam is set to the AUTO position, the system automatically switches to low beam when it detects a vehicle ahead. This enables drivers to maximise the use of high beam, making night-time driving safer, reducing the risk of dazzling on-coming traffic.

Intelligent Speed Limit Assist

The ZS EV will actively detect speed limit signs and alert the driver of the current speed limit byway of a symbol on the driver's instrument cluster. The symbol acts as a reminder to the driver, reducing the risk of exceeding the speed limit.
